- Do not abandon your vehicle
- Hunters must be prepared of emergency
- One (1) dry camp is available

Durst Mountain CWMU Description

The Durst Mountain CWMU is located north of Morgan, Utah and Interstate Highway 84. Cottonwood Creek/Canyon is generally the northern border. Durst Mountain is the high point of the Unit. It is over **9200** feet in elevation. Because Durst Mountain is near the Unit's west boundary elevation only drops to 8700 feet in the west. To the south it drops down to **5200** feet, and to the east and north it decreases to 7600 feet. The entire Unit is quite mountainous.

The Durst Mountain Cooperative Wildlife Management Unit (CWMU) is covered with a mixture of three (3) land cover types, Rocky Mountain Gambel Oak-Mixed Montane Shrubland (41), Inter-Mountain Basins Montane Sagebrush Steppe (62), and Rocky Mountain Aspen Forest and Woodland (22). Other Forest and Woodland types are Rocky Mountain Bigtooth Maple Ravine Woodland (23), Rocky Mountain Montane Mesic Mixed Conifer Forest and Woodland (32), Rocky Mountain Montane Dry-Mesic Mixed Conifer Forest and Woodland (30), and Rocky Mountain Subalpine Mesic Spruce-Fir Forest and Woodland (28). There are also patches of Invasive Perennial Grassland (119).
